➔ **MARKET INFORMATION**

Reksa Dana PG Campuran in October 2017 closed at 1,377.28, risen by 73.50 points, or 5.64 percent higher. This strengthening is in line with the strengthening of Mutual Funds Index (IBFI) which rose 0.80%.

The corporate bond market is showing positive performance so far this year. The average return on corporate bonds from INDOBex Corporate Total Return reached 11.30% when calculated from the beginning of the year to October 20, 2017. The high coupon of corporate bonds from government bond coupon bonds (SBN) made the demand for corporate bonds increased. Where 5-year bonds are able to offer 7.5%-8% coupons. This is supported by low interest rates at the level of 4.25% and inflation is still below 4%. In addition, the improvement of corporate bond market performance is also helped by the Financial Services Authority (POJK) Regulation No. 1 of 2016 in which non-bank financial institutions to invest in SBN.

Global sentiment triggered a decline in bond market performance and price. Negative performance coloring the index of total return of the bond market on the first week of the fourth quarter of 2017. Especially the Fed plan that will gradually release US government securities, expectations of further realization of the policy of tax reform by US President Donald Trump from 35% to 20% and strengthening of US economic indicators by the third quarter of 2017 grew by 3% (QoQ) as well as an increase in the US dollar index of 1.60% (MoM), which also pushed the rupiah at 0.18% (QoQ) in the position of Rp 13,562.5 per US dollar.

Currently, investors are still waiting for unreleased October 2017 trade balance data, but in September 2017 trade balance data posted a surplus of US \$ 1.76 billion and a surplus of US \$ 10.87 billion (year to date). This data will be a positive catalyst of JCI if it increases after IHSG had a steady correction after reaching record highs in recent time. Retail sales data in October is expected to slow down due to a decrease in consumer optimism that stifles spending by lower and upper class people who prefer a holiday to domestic and domestic.

The prospect of Corporate bond market is still quite good amidst the global sentiment but corporate bond movement is more limited than the many government bonds controlled by foreign investors. Meanwhile, corporate bonds are still dominated by local investors. The policy of refinancing to funding ratio that will be issued by BI will make it easier for banks to buy corporate bonds.
